

Questions & Answers  
Tomah Mini-Mart  
54660-2509-15  
03-42-001501

**Question:** The bid documents state that we are to assume a system of 5 AS wells and 6 SVE wells. The drawing included with the bid shows a map with 5 "X" marked. Are these the locations of the proposed AS wells and if so, where are the proposed locations of the 6 SVE wells?

Answer: On the map there are dots placed between the "X's", those dots represent the approximate location of where the SVE wells are to be placed. A 15 foot radius of influence is assumed.

**Question:** Once I've had a chance to review the site information, can I propose moving the AS and SVE wells?

Answer: Location of the AS/SVE wells is approximate. Bidders can propose moving the AS/SVE wells for maximum efficiency. However, for the purpose of this bid base the costs on 5 AS and 6 SVE wells.

**Question:** It says in the Bid Scope that RMT installed a remediation system in 1989. Do you have any information on that? For instance, is operable, is an inspection of the system possible? Do you have access to any system reports that they may have submitted?

Answer: There is no previously installed remedial system at the Tomah Mini Mart site. A closure application for the Tomah Coop(Veldey's, BRRTS# 03 42 000125)site was included in the file documents sent to the copy shop as supplemental information only.

Veldey's is immediately downgradient of Tomah Mini Mart. Like the Mini Mart, Veldey's is related to the area-wide well contamination investigation. A remedial system was installed by RMT at Veldey's in 198
